

Publish Your Research

IEAM Section: Ecosystem Services

IEAM is proud to be the publication outlet for your research on **Ecosystem Services**

Integrated Environmental Assessment and Management: <https://mc.manuscriptcentral.com/ieam>
Submit your manuscript to: Subject Section: "Ecosystem Services"

DETAILS: IEAM welcomes submissions on:

- The development, evaluation, and application of methods for environmental assessment; integrating across a number of ecosystem uses and frameworks (systems-based, cost-benefit, ecosystem services, etc.); measuring or predicting ecosystem status change and adaptation.
- Approaches that connect policy and management tools; harmonize national and international environmental regulation; integrate human well-being into ecological management; develop and sustain the functions of ecosystems; conceptualize, model, and apply concepts of spatial and regional sustainability.
- Assessment and management frameworks that incorporate conservation, life cycle assessment, restoration, and sustainability; considerations for climate-induced adaptation, change and consequences, and vulnerability.
- Environmental management applications using risk-based approaches; considerations for protecting and fostering biodiversity, as well as the enhancement or protection of ecosystem functions and resilience.

AUTHOR GUIDELINES: Papers must address one or more of IEAM's [core areas](#) by discussing how the work can inform environmental management, policy, or decision-making. All submissions, if in scope, are subject to peer review. Please see the [Instructions for Authors](#) for more details.

- No publication fees
- SETAC members receive 20% off Open Access
- Double-anonymous peer review
